

Zen training and super reading of related theorem

Masaaki Yamaguchi

Zen method of training are contrary of brain in assigned line of brain that training of muscle is relaxed with being belong with headarea of brain also relaxed, and this be able to relax of state is steady with no thinking state continued, and this continued state exist with zen method trainings.

This state is emerge with mind of eyes being opened from assigned line and headarea resulted, and this relax create with zen assistance. This zen training result get rid of crazy of thinking and unconsciousness mind is included of books of data. Therefore this reading method is easy with textual data inputted into brain and body as information and books of data, moreover reading data also is easy with this zen method that word and data meanings of difficulty any more.

GSR reading method also is able to understand that meaning of life data, resulted of assigned line and headarea being relaxed, and this state is included from out of data become with zen training. This training be able to open eyes method acquire resulted are opened eyes of necessarily understand state, and deep mind are included from easy of data, therefore meanings of data are deal with easy from GSR method.

GSR method also is understood naturally with information of data by aspire of blood emerged from zen mind created with being from headare and underline area, and relaxed this state becoming data by information of naturally. This deep mind is able to input assemble information easily. This generative state also relax into mind safety feeling.

Zen method is aspect with information and books data into input assemble data in deep mind.
