

Selen and Tell are study of Kyoto university in professors of metal of chemistry chains, more also this chains are drills of badam with whisperd. Selen is progarded with mental condition, Tell is inspire with acknowlege in aquire of possibility with hologlaphic datas. This two metal chemistry are Rantanoid chains. And pair of chains are Actinoid of metal chains. These two chains are one class of spectrum zones. More also this two of metal chains are Toliraphone and Whipacs. Toliraphone is same with Tell, Whipacs is Selen chemistry. I tendency have to be like see a beautifl formed of selen organic chemistry geinu to out of world. This selen form of system is being tend to chain for stress out of pressures. Therefore, this Hidroxy and O_2 and R1, R2 of harmony of respond in access of relax and zen of envy. R1, R2 are Selen and organized of chains in alcorls with organic chemistry.
